REAL ESTATE REVIEW 2025

The BBJ Real Estate Review 2025 examines current trends, expectations and prospects for the Hungary real estate and related industries from the perspectives of the full life-cycle of given property development projects from: planning, financing, regulatory processes, construction, leasing, property management, maintenance and sale to an investor in one publication. This is applied both to new built and reconstructed or renovated real estate developments or redevelopment projects. The property sectors covered in the publication include office, industrial, hotel, industrial and residential and the views and research of companies and leading professionals working in one or more of these property sectors. The different sectors of the real estate industry are examined from the development, construction, locational, ESG and sustainability, investment, architectural and urban planning perspectives.
